

Module title		Abbreviation
Research Concepts in Life Sciences		07-MLS3-122-m01
Module coordinator		Module offered by
degree programme coordinator Biologie (Biology)		Faculty of Biology
ECTS	Method of grading	Only after succ. compl. of module(s)
10	numerical grade	--
Duration	Module level	Other prerequisites
1 semester	graduate	--
Contents		
Students are introduced to research concepts in the life sciences including for example: biophysical approaches to protein structure, transcription and growth control, genetics, signalling cascades and receptor pharmacology, structural biology, neuronal differentiation and microbiology. Topics may vary according to current research areas in the GSLS.		
Intended learning outcomes		
Students are able to recognise the research concepts and their applications in various fields of life sciences currently present in the various section of the GSLS such as neuroscience, infection and immunity, integrative biology and biomedicine and are able to design experiments.		
Courses (type, number of weekly contact hours, language – if other than German)		
Ü + S (no information on SWS (weekly contact hours) and course language available)		
Method of assessment (type, scope, language – if other than German, examination offered – if not every semester, information on whether module is creditable for bonus)		
a) written examination (usually 30 to 60 minutes, including multiple choice questions) or b) log (usually approx. 10 to 30 pages) or c) oral examination of one candidate each (usually 30 to 60 minutes) or d) oral examination in groups of up to 3 candidates (usually approx. 30 to 60 minutes) or e) presentation (usually 20 to 45 minutes) Language of assessment: English
