**Contents**

Quality management and quality control in research labs. Application of the rules of good scientific practice to
a.) scientific publication - definition of plagiarism and related violations - b.) evaluation, presentation, and interpre-
tation of raw data and c.) planning of experiments and scientific controls.

**Intended learning outcomes**

Students meet the academic requirements/possess the knowledge and skills required of a biosafety officer. They have developed an awareness of critical elements in quality management and quality control in research labs. Students know national and international authorities that are responsible for the regulation and control of good scientific conduct and ethical questions involving, in particular, genetically modified organisms. Students understand crucial elements of responsible and ethical conduct of research as well as the consequences of a violation of these rules.

**Courses**

S (no information on SWS (weekly contact hours) and course language available)

**Method of assessment**
