Module title | Microbial Ecology | Abbreviation | 07-MMIÖK-152-m01
--- | --- | --- | ---
Module coordinator | Dean of Studies Biologie (Biology) | Module offered by | Faculty of Biology
ECTS | 3 | Method of grading | Only after succ. compl. of module(s)
Duration | 1 semester | Module level | graduate
Other prerequisites | --
Contents
This lecture discusses fundamental principles of the interaction of bacteria with their environment. A major emphasis is on the interaction of mutualistic bacteria with other organisms including bacteria, invertebrates and vertebrates and, where appropriate, the comparison with commensal and pathogenic interactions. The lecture complements the focus Infektionsbiologie (Infection Biology) of the degree programme Zelluläre und Molekulare Mikrobiologie / Infektionsbiologie (Cellular and Molecular Biology / Infection Biology) in which mainly human pathogens and their host interaction mechanisms are presented. Thus, the lecture intends to identify and describe fundamental concepts of the interaction of bacteria with different host organisms and their evolution.
Intended learning outcomes
Students understand the fundamental principles and evolution of the mechanisms of interaction between bacteria and eukaryotic host organisms.
Courses
V (1)
Module taught in: German and/or English
Method of assessment
Students will be informed about the method, length and scope of the assessment prior to the course. Usually, one of the following options will be chosen: a) written examination (30 to 60 minutes, including multiple choice questions) or b) oral examination of one candidate each (30 to 60 minutes) or c) oral examination in groups of up to 3 candidates (30 to 60 minutes)
Language of assessment: German and/or English
Allocation of places
