## Contents

This lecture series is a joint activity of the Chairs of Neurobiology, Behavioural Physiology and Animal Ecology. It will provide students with insights into these fields, helping them select their F1 and F2 practical courses and providing them with the fundamental knowledge and skills required for the advanced modules of this focus.

### Intended learning outcomes

Students get to know the advantages of an integrative approach when analysing complex biological systems. They learn to relate and integrate different fields within biology.

### Courses

V (no information on SWS (weekly contact hours) and course language available)

### Method of assessment

a) written examination (30 to 60 minutes, including multiple choice questions) or b) oral examination of one candidate each (approx. 30 to 60 minutes) or c) oral examination in groups of up to 3 candidates (approx. 30 to 60 minutes)

### Allocation of places

--

### Additional information

--

### Referred to in LPO I

(examination regulations for teaching-degree programmes)
