Module title: Specific Molecular-, Cell- and Developmental Biology of Plants (Practical Course and Seminar 1)

Module coordinator: holder of the Chair of Plant Physiology and Biophysics

Module offered by: Faculty of Biology

ECTS: 15 (not) successfully completed

Duration: 1 semester

Module level: graduate

Other prerequisites: Admission prerequisite to assessment: regular attendance of lab course and successful completion of the respective exercises as specified at the beginning of the course.

Contents:
The students perform their research work within the context of a current research project on molecular plant and developmental physiology in a largely independent manner under supervision of a principal investigator.

Intended learning outcomes:
Students are able to work on a scientific question, to design an experimental setup as well as to interpret, document and present their results.

Courses (type, number of weekly contact hours, language — if other than German):
S + P (no information on SWS (weekly contact hours) and course language available)

Method of assessment (type, scope, language — if other than German, examination offered — if not every semester, information on whether module is creditable for bonus):
Students will be informed about the length and scope of the assessment prior to the course. Usually, one of the following options will be chosen: a) written examination (30 to 60 minutes, including multiple choice questions) or b) log (approx. 10 to 30 pages) or c) oral examination of one candidate each (30 to 60 minutes) or d) oral examination in groups of up to 3 candidates (approx. 30 to 60 minutes) or e) presentation (20 to 45 minutes)
