Contents		
Well-defined aspects of scientific projects are addressed with independently designed experiments in the context of current research projects in the field of molecular parasitology. The techniques applied are evaluated on the basis of the results obtained and modified where necessary. The results of all experiments as well as the impact on the research project are presented and discussed in a concluding progress report.		
Intended learning outcomes		
The participants are able to independently carry out scientific experiments in the field of molecular parasitology and to modify them according to the outcome. They are able to independently approach current scientific topics and to perform, interpret and document experiments, adhering to accepted rules of scientific practice.		
Courses (type, number of weekly contact hours, language — if other than German)		
P (29) + S (1) Module taught in: German and/or English
