Contents		
[Version 1: Students may complete the practical course <i>Schwerpunkt-Praktikum</i> either in zoology or in botany. The course will build on the knowledge and skills students have acquired in previous courses and will revisit selected aspects. Students will perform experiments to explore these aspects in more detail. The seminar will address classical and current topics in biology with students delivering presentations and discussing the respective topics.] [Version 2: This module will provide students with an overview of practical biology sessions that are implemented in a teach'n'learn lab/teach'n'learn garden. Having acquired an overview of major methods in biology, students will learn to incorporate these into school-specific contexts. Students will prepare classroom and lab sessions, will be trained in important techniques for measuring how effective a session was and will practise teaching these sessions to pupils in the teach'n'learn lab/teach'n'learn garden. This will also require close co-operation with the supervising teacher of the placement class.]		
Intended learning outcomes		
Knowledge of both traditional and modern methods in biology. - Ability to prepare sessions in a teach'n'learn lab/teach'n'learn garden and perform the respective follow-up work. - Familiarity with ways to help pupils become interested and motivated learners.
