In this module, students will present the results of (their own) research - conducted for their thesis or during lab course projects, for example - in the form of a poster meeting the standards of (international) conferences. Preparation of the poster will be supervised and graded by the respective thesis/project supervisor.

**Intended learning outcomes**

Students will be able to present the results of their work in a condensed yet comprehensible form. They will be able to present key aspects of their work in a clear and appropriate manner, providing all the necessary information to allow both experts in the field and scientists who are not familiar with every detail to understand the matter. Having prepared scientific posters, students will find it easier to structure scientific manuscripts.

**Courses**

Ü (no information on SWS (weekly contact hours) and course language available)

**Method of assessment**

completed poster meeting the standards of national and international conferences

Language of assessment: English

**Allocation of places**
