

Module title				Abbreviation	
Basics in Sy	stem Administration		07-SQF-GSA-102-m01		
Module coordinator			Module offered by		
holder of the Chair of Bioinformatics		Faculty of Biology			
ECTS Method of grading		Only after succ. compl. of module(s)			
2 (no) successfully completed				
Duration Module level		Other prerequisites			
1 semester undergraduate					
Contents					
The lecture will introduce students to the functioning of a variety of operating systems (Linux, Mac OSX, Win- dows). Practical exercises in the computer room will accompany the interactive lecture.					
Intended learning outcomes					
Students will demonstrate a basic familiarity with the operating systems discussed and will be able to perform basic operations in different system environments. They will be able to work with a broader range of operating systems than just one.					
Courses (type, number of weekly contact hours, language — if other than German)					
V + Ü (no information on SWS (weekly contact hours) and course language available)					
Method of assessment (type, scope, language – if other than German, examination offered – if not every semester, information on whether module is creditable for bonus)					
written examination or practical examination (approx. 30 minutes)					
Allocation of places					
Number of places: 20. Should the number of applications exceed the number of available places, places will be allocated as follows: Places will primarily be allocated to students of the Bachelor's degree subject Biologie (Biology) with 180 ECTS credits. Should the module be used in other subjects, there will be two quotas: 95% of places will be allocated to students of the Bachelor's degree subject Biologie (Biology) with 180 ECTS credits and 5% of places (a minimum of one participant in total) will be allocated to students of the Bachelor's degree subject Biologie (Biology) with 400 ECTS credits and to students of the Bachelor's degree subjects Computational Mathematics and Mathematik (Mathematics), each with 180 ECTS credits, as part of the application-oriented subject Biology (as well as potentially to students of other 'importing' subjects). Should the number of places available in one quota exceed the number of applications, the remaining places will be allocated to applicants from the other quota. Should there be, within one module component, several courses with a restricted number of places, there will be a uniform regulation for the courses of one module component. In this case, places on all courses of a module component that are concerned will be allocated in a standardised procedure. In this procedure, applicants who already have successfully completed at least one other module component of the respective module will be given preferential consideration. A waiting list will be maintained and places re-allocated as they become available. Selection process group 1 (95%): Places will primarily be allocated according to the applicants' previous academic achievements. For this purpose, applicants will be ranked according to the anther dual the raverage grade of all assessments taken during their studies or of ECTS credits (qualitative ranking) and, secondly, according to their total number of ECTS credits achieved (quantitative ranking). The applicants' position in a third ranking will be calculated as th
