

<b>Module title</b>		<b>Abbreviation</b>
Analytical Chemistry 1		o8-AN1-072-m01
<b>Module coordinator</b>		<b>Module offered by</b>
lecturer of lecture "Analytische Chemie" (Analytical Chemistry)		Institute of Inorganic Chemistry
<b>ECTS</b>	<b>Method of grading</b>	<b>Only after succ. compl. of module(s)</b>
12	numerical grade	--
<b>Duration</b>	<b>Module level</b>	<b>Other prerequisites</b>
1 semester	undergraduate	By way of exception, additional prerequisites are listed in the section on assessments.
<b>Contents</b>		
<p>This module equips students with an advanced knowledge of the periodic table and selected elements. It focuses on bonding conditions, trends in the periodic table and the description and structure of elements. In addition, it introduces students to elementary organic chemistry, coordination chemistry and complex chemistry. The module gives students the opportunity to apply in practice the knowledge they have gained through the related lecture(s). After a safety briefing, the students autonomously conduct experiments in the laboratory. These experiments focus on different methods for the analysis of unknown substances.</p>		
<b>Intended learning outcomes</b>		
<p>Students are able to characterise main group elements and transition metal elements in terms of their structure, reactivity and fabrication. They are able to identify the coordination of the atoms. In addition, they have learned how to use the periodic table, an essential tool for chemists. Students are able to use different methods to analyse unknown substances. In addition, they are able to separate and analyse mixtures.</p>		
<b>Courses</b> (type, number of weekly contact hours, language – if other than German)		
<p>This module comprises 2 module components. Information on courses will be listed separately for each module component.</p> <ul style="list-style-type: none"> <li>• o8-AN1-1-072: V + Ü (no information on SWS (weekly contact hours) and course language available)</li> <li>• o8-AN1-2-072: P (no information on SWS (weekly contact hours) and course language available)</li> </ul>		
<b>Method of assessment</b> (type, scope, language – if other than German, examination offered – if not every semester, information on whether module is creditable for bonus)		
<p>Assessment in this module comprises the assessments in the individual module components as specified below. Unless stated otherwise, successful completion of the module will require successful completion of all individual assessments.</p> <p><b>Assessment in module component o8-AN1-1-072:</b> Principles of Analytical Chemistry Principles of Analytical Chemistry</p> <ul style="list-style-type: none"> <li>• 6 ECTS, Method of grading: numerical grade</li> <li>• written examination (90 minutes)</li> <li>• Other prerequisites: Registration for assessment: Yes, as specified.</li> </ul> <p><b>Assessment in module component o8-AN1-2-072:</b> Analytical Chemistry (lab)</p> <ul style="list-style-type: none"> <li>• 6 ECTS, Method of grading: (not) successfully completed</li> <li>• Vortestate (pre-experiment exams, approx. 15 minutes each), assessment of practical performance, Nachtestate (post-experiment exams, approx. 15 minutes each)</li> <li>• Assessment offered: once a year, summer semester</li> </ul>
