<b>Contents</b>		
This module gives students the opportunity to enhance their skills in advanced synthesis and analytical methods in functional materials. Students will be expected to conduct their work in the lab independently, write a lab report documenting their findings and deliver a presentation.		
<b>Intended learning outcomes</b>		
Students are able to use advanced synthesis and analytical methods in materials science in the lab and to interpret their findings. They are able to write a lab report documenting their findings and deliver a presentation.		
<b>Courses</b> (type, number of weekly contact hours, language – if other than German)		
P (no information on SWS (weekly contact hours) and course language available)		
<b>Method of assessment</b> (type, scope, language – if other than German, examination offered – if not every semester, information on whether module is creditable for bonus)		
Research lab course in two 4-week blocks: a) 2 pieces of practical work with 2 lab reports (approx. 20 pages each) and b) 2 talks with discussion (approx. 15 minutes each). Research lab course in one 8-week block: c) one piece of practical work with lab report (approx. 40 pages) and d) talk with discussion (approx. 30 minutes) Language of assessment: German, English
