Duration	Module level	Other prerequisites
1 semester	graduate	--
Contents		
Chemical composition, production and analysis of conventional and special foodstuffs and animal feed. Chemical alteration, function and effect of food ingredients as well as legal regulations in the field of special foodstuffs and animal feed. Conception and performance of experiments as well as evaluation and interpretation of measurement data with the objective to answer a scientific issue.		
Intended learning outcomes		
The students know the chemistry and analysis of foodstuffs and animal feed as well as of special foodstuffs with functional ingredients or genetically modified organisms. The students are able to understand and critically evaluate scientific studies and assessments of food ingredients and special foodstuffs, also considering legal regulations. The students can identify advantages and disadvantages of different analytical methods and select appropriate methods for answering a scientific issue. The students are able to evaluate the identity, quality and safety of foodstuffs using valid analysis results, appropriate methods for statistical evaluation and presentation.		
Courses (type, number of weekly contact hours, language – if other than German)		
V (1) + V (1) + P (1) + Ü (1)		
Method of assessment (type, scope, language – if other than German, examination offered – if not every semester, information on whether module is creditable for bonus)
