| The module covers current and/or special topics in Medicinal Chemistry.  |                          |   |
| <b>Intended learning outcomes</b>  |                          |   |
| The student has advanced knowledge of selected topics in Medicinal Chemistry. He/she is able to classify the acquired knowledge in the subject-specific contexts, knows the application areas and can assess the relevance for various experimental syntheses as well as measurement and analysis methods.                                     |                          |   |
