lab course supervisor       Institute of Organic Chemistry         ECTS       Method of grading       Only after succ. compl. of module(s)         5       numerical grade          Duration       Module level       Other prerequisites         1 semester       graduate          Contents           This module equips students with an advanced knowledge of NMR and mass spectrometry. It offers deeper in-       sights into the theoretical principles of the two measuring techniques and includes exercises that give students the opportunity to learn how to evaluate complicated spectra and use a spectrometer.         Intended learning outcomes       Students are able to discuss NMR and mass spectroscopy demonstrating a high degree of expertise in the field. They are able to experiment with both spectrometers and analyse complicated spectra.         Courses (type, number of weekly contact hours, language – if other than German)       P (no information on SWS (weekly contact hours) and course language available)         Method of assessment (type, scope, language – if other than German, examination of one candidate each (approx. 20 to 30 minutes) or c) or al examination in groups (groups of 2: approx 30 minutes). Students will be informed about the type and length of assessment prior to the course.         Language of assessment prior to the course.
