Contents					
Students will be made familiar with the latest state of the art by the analysis of scientific literature. By the inde- pendent preparation and presentation of presentations, students learn to write academic papers and the ana- lysis and discussion about papers from fellow students and technical skills, the ability to take criticism and the current status of academic discussion as well as methodological knowledge during the processing of scientific issues. The topics of the papers give all an overview of the latest state-of-the-art in this topic area. The analysis of the latest state-of-the-art, which can particularly be found in scientific journals, is a precondition in order to process successfully. During the tutorial, feedback will take place through the direct discussion and the prelimi- nary discussion and debriefing with the conference manager.					
Intended learning outcomes					
Students acquire consolidated knowledge of selected topic areas of "Physical Geography". They will be introdu- ced to the state of research and learn to process and evaluate scientific results as well as to use them context-re- lated. Students acquire the ability to prepare scientific specialised literature themed, to conceptualise and pre- sent scientific texts as well as to analyse, structure and process issues of "Physical Geography" by theoretical and methodological research approaches.
