

Module title		Abbreviation
Algorithms, AI and Data Science 2		10-I-AKIDS2-222-mo1
Module coordinator		Module offered by
Dean of Studies Informatik (Computer Science)		Institute of Computer Science
ECTS	Method of grading	Only after succ. compl. of module(s)
10	numerical grade	--
Duration	Module level	Other prerequisites
1 semester	undergraduate	--
Contents		
<p>Building on the introductory course "Algorithms, AI and Data Science 1", this module introduces the logical and algorithmic foundations of computer science and artificial intelligence. In addition to dealing with basic algorithmic strategies for solving fundamental problems, approaches to logical reasoning in computer science are introduced. A treatment of elementary probabilistic methods for modeling uncertainties forms the basis for the introduction of simple statistical methods with which supervised and unsupervised problems of machine learning can be addressed.</p>		
Intended learning outcomes		
<p>Students master the logical and algorithmic fundamentals of computer science. They are able to independently develop solutions for specific computer science problems using an analytical approach. Students are proficient in common problem-solving strategies and have initial experience of how these can be used in the context of artificial intelligence. They know basic approaches for deriving logical conclusions, have an understanding of formal approaches for modeling uncertainties and know how these are used in the context of machine learning.</p>		
Courses (type, number of weekly contact hours, language — if other than German)		
V (4) + Ü (2)		
Method of assessment (type, scope, language — if other than German, examination offered — if not every semester, information on whether module is creditable for bonus)		
<p>written examination (approx. 60 to 120 minutes). If announced by the lecturer at the beginning of the course, the written examination may be replaced by an oral examination of one candidate each (approx. 20 minutes) or an oral examination in groups of 2 candidates (approx. 15 minutes per candidate). creditable for bonus</p>		
Allocation of places
