### Contents

Selected topics in aerospace engineering, for example: satellite communication, rocket science, propulsion systems, sensors and actuators for orientation control, perturbation of orbits, interplanetary orbits, rendezvous and docking, design of space ships, design of planetary bases, life support systems, special aspects of operations, payloads, optical systems, RADAR, earth monitoring, thermo management, structure of space ships, special areas of navigation, space environment, test of space faring systems, space astronomy and planet missions, space medicine and biology, material science, quality management, space law.

### Intended learning outcomes

The students possess an advanced knowledge about the respective topic of the selected area and are able to consider these foundations in their future plans of air or spaceborne systems.

### Courses (type, number of weekly contact hours, language — if other than German)

### Method of assessment (type, scope, language — if other than German, examination offered — if not every semester, information on whether module is creditable for bonus)

- **written examination** (approx. 60 to 120 minutes).
  - If announced by the lecturer at the beginning of the course, the written examination may be replaced by an oral examination of one candidate each (approx. 20 minutes) or an oral examination in groups of 2 candidates (approx. 15 minutes per candidate).
  - Language of assessment: German and/or English

### Allocation of places

- 

### Additional information

- 

### Referred to in LPO I (examination regulations for teaching-degree programmes)

- 

### Module appears in

- Bachelor’ degree (1 major) Aerospace Computer Science (2015)
- Bachelor’ degree (1 major) Aerospace Computer Science (2017)
