Module title: Basics in Algorithms and Data Structures for Students of Mathematics for Economics

Abbreviation: 10-I-GADW-172-m01

Module coordinator:
Dean of Studies Informatik (Computer Science)

Module offered by:
Institute of Computer Science

ECTS:
10

Method of grading:
Only after succ. compl. of module(s)

Duration:
1 semester

Module level:
undergraduate

Other prerequisites:
--

Contents:
Design and analysis of algorithms, recursion vs. iteration, sort and search methods, data structures, abstract data types, lists, trees, graphs, basic graph algorithms, programming in Java.

Intended learning outcomes:
The students are able to independently design algorithms as well as to precisely describe and analyse them. The students are familiar with the basic paradigms of the design of algorithms and are able to apply them in practical programs. The students are able to estimate the run-time behaviour of algorithms and to prove their correctness.

Courses:
(type, number of weekly contact hours, language — if other than German)
V (4) + Ü (2)

Method of assessment:
(type, scope, language — if other than German, examination offered — if not every semester, information on whether module is creditable for bonus)
a) exercises (consisting in completion of approx. 11 home work exercise sheets, presentation of own solutions in the exercise groups as well as approx. 5 short assessments written in the exercise group) or b) Written examination (approx. 180 to 240 minutes)
Die Prüfungsart ist vom Prüfling festzulegen
creditable for bonus

Allocation of places:
--

Additional information:
--

Referred to in LPO I:
(examination regulations for teaching-degree programmes)
--

Module appears in:
Bachelor' degree (1 major) Economathematics (2017)
