## Module title

**Introduction To Space Physics**

**Abbreviation**

10-I-SP-072-m01

## Module coordinator

holder of the Chair of Computer Science VII

## Module offered by

Institute of Computer Science

## ECTS

7.50

## Method of grading

numerical grade

## Only after succ. compl. of module(s)

--

## Duration

1 semester

## Module level

graduate

## Other prerequisites

--

## Contents

1. Overview  
2. Dynamics of charged particles in magnetic and electric fields  
3. Elements of space plasma physics  
4. Sun and heliosphere  
5. Acceleration and transport of energetic particles in the heliosphere  
6. Instruments for measuring energetic particles in space.

## Intended learning outcomes

The students possess a fundamental knowledge about space physics and, in particular, the description of the dynamics of charged particles in the heliosphere and in space. They are familiar with the relevant parameters, their theoretical formulation and the methods to measure them.

## Courses

V + Ü (no information on SWS (weekly contact hours) and course language available)

## Method of assessment

(type, scope, language — if other than German, examination offered — if not every semester, information on whether module is creditable for bonus)

--

## Allocation of places

--

## Additional information

--

## Referred to in LPO I

(examination regulations for teaching-degree programmes)

--

## Module appears in

Master's degree (1 major) Space Science and Technology (2007)
