### Contents
IR models (e.g. Boolean and vector space model, evaluation), processing of text (tokenising, text properties), data structures (e.g. inverted index), query elements (e.g. query operations, relevance feedback, query languages and paradigms, structured queries), search engine (e.g. architecture, crawling, interfaces, link analysis), methods to support IR (e.g. recommendation systems, text clustering and classification, information extraction).

### Intended learning outcomes
The students possess theoretical and practical knowledge in the area of information retrieval and have acquired the technical know-how to create a search engine.

### Courses
(type, number of weekly contact hours, language — if other than German)

V (2) + Ü (2)

### Method of assessment
(type, scope, language — if other than German, examination offered — if not every semester, information on whether module is creditable for bonus)

written examination (approx. 60 to 120 minutes).

If announced by the lecturer at the beginning of the course, the written examination may be replaced by an oral examination of one candidate each (approx. 20 minutes) or an oral examination in groups of 2 candidates (approx. 15 minutes per candidate).

Language of assessment: German and/or English

### Allocation of places
--

### Additional information
Focuses available for students of the Master’s programme Informatik (Computer Science, 120 ECTS credits):
IT, KI, HCI, GE

### Workload
150 h

### Teaching cycle
--

### Referred to in LPO I (examination regulations for teaching-degree programmes)
--

### Module appears in
Master’s degree (1 major) Computer Science (2021)
Master’s degree (1 major) Computational Mathematics (2022)
Master’s degree (1 major) Information Systems (2022)
Master’s degree (1 major) Mathematics (2022)
Master’s degree (1 major) Computer Science (2023)
