## Module coordinator
Dean of Studies Informatik (Computer Science)  
Institute of Computer Science

## ECTS
10

## Method of grading
(only if not successfully completed)

## Duration
1 semester

## Module level
graduate

## Other prerequisites
--

## Contents
Completion of a practical task.

## Intended learning outcomes
The practical allows participants to work on a problem in computer science in teams.

## Courses
P (no information on SWS (weekly contact hours) and course language available)

## Method of assessment
written elaboration, details to be specified by the lecturer at the beginning of the course  
Language of assessment: German, English if agreed upon with the examiner

## Allocation of places
--

## Additional information
In seminars and lab courses, participants are not entitled to claim certain topics of seminars/lab courses.

## Referred to in LPO I
(examination regulations for teaching-degree programmes)

## Module appears in
Master’s degree (1 major) Computer Science (2010)
