**Duration**
1 semester

**Module level**
graduate

**Other prerequisites**
--

**Contents**
Multi-disciplinary project in the area of aerospace that covers areas such as mechanical components, electronics and software. In this context, current and relevant topics from research are reviewed.

**Intended learning outcomes**
Students will practise reviewing complex topics in interdisciplinary teams. They will be required to plan, execute and check their work. At the end of the course, they will have created a completely functional system.

**Courses**
(type, number of weekly contact hours, language — if other than German)

R (8)
Module taught in: English

**Method of assessment**
(type, scope, language — if other than German, examination offered — if not every semester, information on whether module is creditable for bonus)

project (project documentation (approx. 20 pages) with presentation (30 to 45 minutes) and subsequent discussion on the topic)
Language of assessment: English

**Allocation of places**
--

**Additional information**
--

**Workload**
300 h

**Teaching cycle**
--

**Referred to in LPO I**
(examination regulations for teaching-degree programmes)
--

**Module appears in**
Master's degree (1 major) Satellite Technology (2018)
