

Module title		Abbreviation
Overview Applied Algebra and Discrete Mathematics		10-M-AADI-Ü-232-m01
Module coordinator		Module offered by
Dean of Studies Mathematik (Mathematics)		Institute of Mathematics
ECTS	Method of grading	Only after succ. compl. of module(s)
12	numerical grade	--
Duration	Module level	Other prerequisites
1 semester	undergraduate	--
Contents		
<p>Techniques from combinatorics, introduction to graph theory (including applications), cryptographic methods, error-correcting codes.</p> <p>Topics in field theory (particularly algebraic field extensions, ruler and compass constructions, basics in Galois theory, solvability of equations, cyclotomic fields, finite fields). Applications of algebra and number theory (e.g., coding theory, cryptography, computer algebra).</p>		
Intended learning outcomes		
<p>The student has extensive knowledge of the mathematical ways of thinking and working as well as of proof methods, so that he/she masters the basic notions of algebra and discrete mathematics and can apply them to elementary problems in other fields of mathematics.</p>		
Courses (type, number of weekly contact hours, language – if other than German)		
V (4) + Ü (2)		
Method of assessment (type, scope, language – if other than German, examination offered – if not every semester, information on whether module is creditable for bonus)		
<p>oral examination of one candidate each (20 to 40 minutes)</p> <p>Assessment will have reference to two topics in pure mathematics as agreed upon with the examiner. Each topic may only be selected as the subject of one examination in the sub-fields Gesamtüberblick (Overview).</p> <p>Language of assessment: German and/or English</p>		
Allocation of places		
--		
Additional information		
--		
Workload		
360 h		
Teaching cycle		
--		
Referred to in LPO I (examination regulations for teaching-degree programmes)		
--		
Module appears in		
Bachelor' degree (1 major) Mathematics (2023)
