

| Module title | | | | | Abbreviation |
|--|--|--------------------------------------|---------------------|--------------------------|---------------------|
| Overview Algebra and Applied Algebra | | | | | 10-M-ALAA-Ü-232-m01 |
| Module coordinator | | | | Module offered by | |
| Dean of Studies Mathematik (Mathematics) | | | | Institute of Mathematics | |
| ECTS Method of grading | | Only after succ. compl. of module(s) | | | |
| 12 numerical grade | | | | | |
| Duration | | Module level | Other prerequisites | | |
| 1 semester | | undergraduate | | | |
| Contents | | | | | |
| Topics in Group Theory (particularly finite abelian groups, normal subgroups, sub- and factorgroups, isomor- phism theorems, solvability, group operations, Sylow theorems; examples: cyclic groups, alternating and sym- metric groups, dihedral groups). Topics in ring theory (particularly ideals, divisibility, polynomial rings, irreducibility of polynomials). Topics in number theory (particularly Euclidean algorithm, Fermat's little theorem, Euler's theorem, Chinese re- mainder theorem, residue class rings and their unit groups, quadratic number rings). Topics in field theory (particularly algebraic field extensions, ruler and compass constructions, basics in Galois theory, solvability of equations, cyclotomic fields, finite fields). Applications of algebra and number theory (e.g., coding theory, cryptography, computer algebra). Intended learning outcomes The student has extensive knowledge of the mathematical ways of thinking and working as well as of proof me- thods, so that he/she masters the basic notions of algebra and number theory and can apply them to elementary problems in other fields of mathematics. Courses (type, number of weekly contact hours, language – if other than German) | | | | | |
| $V(a) + \ddot{U}(2)$ | | | | | |
| Method of assessment (type, scope, language — if other than German, examination offered — if not every semester, information on whether | | | | | |
| module is creditable for bonus) | | | | | |
| oral examination of one candidate each (20 to 40 minutes) Assessment will have reference to two topics in pure mathematics as agreed upon with the examiner. Each topic may only be selected as the subject of one examination in the sub-fields Gesamtüberblick (Overview). Language of assessment: German and/or English | | | | | |
| Allocation of places | | | | | |
| | | | | | |
