### Contents

Existence and uniqueness theorem; continuous dependence of solutions on initial values, systems of linear differential equations, matrix exponential series, linear differential equations of higher order.

### Intended learning outcomes

The student is acquainted with the fundamental concepts and methods of the theory of ordinary differential equations. He/she is able to apply these methods to practical problems.

### Courses

(type, number of weekly contact hours, language — if other than German)

V (4) + Ü (2)

### Method of assessment

(type, scope, language — if other than German, examination offered — if not every semester, information on whether module is creditable for bonus)

- a) written examination (approx. 90 to 180 minutes, usually chosen) or
- b) oral examination of one candidate each (15 to 30 minutes) or
- c) oral examination in groups (groups of 2, 10 to 15 minutes per candidate)

Language of assessment: German and/or English creditable for bonus

### Allocation of places

--

### Additional information

--

### Referred to in LPO I (examination regulations for teaching-degree programmes)

--

### Module appears in

- Bachelor' degree (1 major) Computer Science (2015)
- Bachelor' degree (1 major) Aerospace Computer Science (2015)
- Bachelor' degree (1 major) Functional Materials (2015)
- Bachelor' degree (1 major) Aerospace Computer Science (2017)
- Bachelor' degree (1 major) Computer Science (2017)
- Bachelor' degree (1 major) Computer Science (2019)
- Bachelor' degree (1 major) Aerospace Computer Science (2020)
- Bachelor' degree (1 major) Functional Materials (2021)
- Bachelor' degree (1 major) Computer Science und Sustainability (2021)
