**Module title** | **Overview Discrete Mathematics and Projective Geometry**
---|---
**Abbreviation** | 10-M-DIPG-Ü-152-m01

**Module coordinator** | Dean of Studies Mathematik (Mathematics)
**Module offered by** | Institute of Mathematics

**Contents**
Techniques from combinatorics, introduction to graph theory (including applications), cryptographic methods, error-correcting codes; projective and affine planes, projective and affine spaces, theorem of Desargues, fundamental theorems for projective spaces, dualities and polarities of projective spaces.

**Intended learning outcomes**
The student is acquainted with fundamental concepts and methods in projective geometry and discrete mathematics. He/She is able to relate these concepts with one another, and realises the advantages of thinking across the borders of different branches in mathematics.

**Courses**
(type, number of weekly contact hours, language — if other than German)

| V (4) + Ü (2) |

**Method of assessment**
(type, scope, language — if other than German, examination offered — if not every semester, information on whether module is creditable for bonus)

| oral examination of one candidate each (20 to 40 minutes) |

Assessment will have reference to two topics in pure mathematics as agreed upon with the examiner. Each topic may only be selected as the subject of one examination in the sub-fields Gesamtüberblick (Overview).

Language of assessment: German and/or English

**Allocation of places**
--

**Additional information**
--

**Referred to in LPO I**
(examination regulations for teaching-degree programmes)
