|--|--------------------------|---|
| Module title | | Abbreviation |
| Overview Optimization for Machine Learning and Partial Differential Equations | | 10-M-OMPA-Ü-232-m01 |
| Module coordinator | | Module offered by |
| Dean of Studies Mathematik (Mathematics) | | Institute of Mathematics |
| ECTS | Method of grading | Only after succ. compl. of module(s) |
| 12 | numerical grade | -- |
| Duration | Module level | Other prerequisites |
| 1 semester | undergraduate | -- |
| Contents | | |
| <p>Linear programming, quadratic programming, convex optimization, first order methods, application to machine learning problems such as support vector machines.</p> <p>Examples of partial differential equations and partial differential equations of first order, existence and uniqueness theorems, basic equations of mathematical physics, boundary value problems, maximum principle and Dirichlet problem.</p> | | |
| Intended learning outcomes | | |
| <p>The student is acquainted with fundamental concepts and methods in optimization and the theory of partial differential equations. He/She is able to relate these concepts with one another, and realises the advantages of thinking across the borders of different branches in mathematics.</p> | | |
| Courses (type, number of weekly contact hours, language – if other than German) | | |
| V (4) + Ü (2) | | |
| Method of assessment (type, scope, language – if other than German, examination offered – if not every semester, information on whether module is creditable for bonus) | | |
| <p>oral examination of one candidate each (20 to 40 minutes)</p> <p>Assessment will have reference to two topics in pure and applied mathematics as agreed upon with the examiner. Each topic may only be selected as the subject of one examination in the sub-fields Gesamtüberblick (Overview).</p> <p>Language of assessment: German and/or English</p> | | |
