Duration	Module level	Other prerequisites
1 semester	undergraduate	--
Contents		
Design and analysis of algorithms, recursion vs. iteration, sort and search methods, data structures, abstract data types, lists, trees, graphs, basic graph algorithms, programming in Java.		
Intended learning outcomes		
The students master to independently design algorithms, to describe them precisely and to analyze them. The students know the basic paradigms of the design of algorithms and are able to apply them to practical programs. The students are able to estimate the run time behaviour of algorithms and to prove their correctness.		
Courses (type, number of weekly contact hours, language – if other than German)
