1 semester	graduate	--
<b>Contents</b>		
The module deals with different areas of professional practice and examines various disciplines from the companies the students are working with.		
<b>Intended learning outcomes</b>		
The student has specialized experience in the working processes of respective companies as well as interdisciplinary knowledge. The student is able to solve practical problems using scientific methods by using management concepts methods and the student can transfer both methods and results to other work areas. The student is capable of solving practical tasks autonomously. Also the student can take this knowledge and apply it to different situations. The students uses conventional and organizational strategies as well as tools and methods with sophisticated knowledge to find solutions. The student is also able to schedule processes to design and implement the relevant facts and to discuss and present them in an appropriate way.
