

Module description

Module title					Abbreviation
xtAl Lab 2					10-xtAl=L2-202-m01
Module coordinator				Module offered by	
Dean of Studies Informatik (Computer Science)				Institute of Computer Science	
ECTS	Metho	od of grading	Only after succ. con	er succ. compl. of module(s)	
10	nume	rical grade			
Duration		Module level	Other prerequisites		
1 semester		graduate			
Contents					
Based on the knowledge and competencies from the XtAl Lab1, specific methods are identified to extend the existing XtAl application prototype and develop it into a fully functional application. In order to meet the requirements of an XtAl application prototype, more advanced data processing and mining approaches are taught. Within the XtAl Lab2 the basic theoretical and practical competences for the design and extension of XtAl applications are learned.					
Intended learning outcomes					
By the completion of XtAI Lab 2, students have concluded the entire development cycle of an XtAI application. The knowledge acquired now reaches deep into the programmatic details of complex XtAI applications. At the same time, students have learned to design and implement artificial intelligence systems in current frameworks. Courses (type, number of weekly contact hours, language — if other than German)					
R (6) Module taught in: English					
Method of assessment (type, scope, language — if other than German, examination offered — if not every semester, information on whether module is creditable for bonus)					
Project: report (approx. 20 pages) with presentation (30 to 45 minutes) and subsequent discussion on the topic Language of assessment: English Creditable for bonus					
Allocation of places					
Additional information					
Workload					
300 h					
Teaching cycle					
Referred to in LPO I (examination regulations for teaching-degree programmes)					
Module appears in					
Master	's degr	ee (1 major) eXtended Art	tificial Intelligence (xt	(2020)
