### Contents
In the xtAI courses, basic aspects and competences are taught, which the students can comprehend in the corresponding exercises. In the xtAI Lab3 these different competences and aspects are integrated to develop a comprehensive xtAI application on their own. As in the xtAI Lab1 and 2, the projects are worked on in groups. Depending on the students’ interests, highly specialized and innovative applications from the xtAI field can be developed. Lectures and exercises consolidate the necessary theoretical concepts or practical skills.

### Intended learning outcomes
At the end of the xtAI Lab3, students have a deeper understanding of the architectures of xtAI applications and the interaction of the individual components and solutions. In particular, students are able to design extensive xtAI projects and make complex modifications to AI models.

### Courses
R (6)

*Module taught in:* English

### Method of assessment
Project: report (approx. 20 pages) with presentation (30 to 45 minutes) and subsequent discussion on the topic

*Language of assessment:* English

*Creditable for bonus:

### Allocation of places
--

### Additional information
--

### Workload
300 h

### Teaching cycle
--

### Referred to in LPO I
(examination regulations for teaching-degree programmes)
--

### Module appears in
Master’s degree (1 major) eXTended Artificial Intelligence (xtAI) (2020)
