| Foundations in the following areas: Theoretical knowledge and practical experience in machine learning. Mo- dels, approaches and algorithms, and their practical implementation for the classical problems of machine lear- ning. Supervised and unsupervised learning methods. | | | | | | |
| Intended learning outcomes | | | | | | |
| The students have theoretical and practical knowledge of typical models, methods and algorithms in the field of machine learning. They are able to solve practical problems in the field of machine learning with the help of appropriate methods. They have experience in the application or implementation of machine learning approaches. | | | | | | |
