

Module title		Abbreviation
Theory of Artificial Intelligence 2		10-xtAI=TAI2-202-m01
Module coordinator		Module offered by
Dean of Studies Informatik (Computer Science)		Institute of Computer Science
ECTS	Method of grading	Only after succ. compl. of module(s)
5	numerical grade	--
Duration	Module level	Other prerequisites
1 semester	graduate	--
Contents		
<p>The lecture provides theoretical or practical knowledge about classical and modern algorithms and methods applied in the field of artificial intelligence. The most important problems are considered and the recent approaches to their solution are taught. Advanced models and methods of Artificial Intelligence as well as their technical backgrounds are presented and the relevant application possibilities for problems in the field of AI are shown.</p>		
Intended learning outcomes		
<p>The students have knowledge of advanced models, methods and techniques in the field of artificial intelligence and are able to independently identify and apply suitable methods for concrete problems.</p>		
Courses (type, number of weekly contact hours, language – if other than German)		
<p>V (2) + Ü (2) Module taught in: English</p>		
Method of assessment (type, scope, language – if other than German, examination offered – if not every semester, information on whether module is creditable for bonus)		
<p>Written examination (approx. 60 to 120 minutes) If announced by the lecturer at the beginning of the course, the written examination may be replaced by an oral examination of one candidate each (approx. 20 minutes) or an oral examination in groups of 2 candidates (approx. 15 minutes per candidate). Language of assessment: English Creditable for bonus</p>		
Allocation of places
