## Module title
Preparatory Course Computational Physics

## Abbreviation
11-A1VK-072-m01

### Module coordinator
Managing Director of the Institute of Theoretical Physics and Astrophysics

### Module offered by
Faculty of Physics and Astronomy

### ECTS
6

### Method of grading
Numerical grade

### Only after succ. compl. of module(s)
--

### Duration
1 semester

### Module level
Undergraduate

### Other prerequisites
Admission prerequisite to assessment: successful completion of approx. 50% of exercises. Certain prerequisites must be met to qualify for admission to assessment. The lecturer will inform students about the respective details at the beginning of the course. Registration for the course will be considered a declaration of will to seek admission to assessment. If students have obtained the qualification for admission to assessment over the course of the semester, the lecturer will put their registration for assessment into effect. Students who meet all prerequisites will be admitted to assessment in the current or in the subsequent semester. For assessment at a later date, students will have to obtain the qualification for admission to assessment anew.

## Contents
Introduction to two of the programming languages relevant for students of Physics and Engineering (C++, Mathematica, Java).

## Intended learning outcomes
The students have knowledge of the programming languages taught in university. They are able to implement simple algorithms in these languages.

## Courses
(V + Ü (no information on SWS (weekly contact hours) and course language available)

## Method of assessment
written examination (approx. 120 minutes)

## Allocation of places
Only as part of pool of general key skills (ASQ): 15 places. Places will be allocated by lot.

## Additional information
--

## Referred to in LPO I
(examination regulations for teaching-degree programmes)

--

## Module appears in
Bachelor' degree (1 major) Physics (2010)
