**Module title**  
Models Beyond the Standard Model of Elementary Particle Physics  

**Abbreviation**  
11-BSM-161-m01

**Module coordinator**  
Managing Director of the Institute of Theoretical Physics and Astrophysics

**Module offered by**  
Faculty of Physics and Astronomy

**Duration**  
1 semester

**Module level**  
graduate

**Other prerequisites**  
--

**Contents**

1. Principles of the standard model of Elementary Particle Physics  
2. Tests of the standard model in low energy experiments and at high energy colliders  
3. Neutrino physics  
4. Higgs physics.

In addition, a selection of topics from the following fields will be covered in different years:  
- Phenomenology of experiments at the LHC,  
- particle cosmology,  
- extended gauge theories,  
- models with extended Higgs sectors,  
- supersymmetry,  
- models with additional space-time dimensions

**Intended learning outcomes**

The students are familiar with the tests and limits of the standard model of Particle Physics, Higgs physics and neutrino physics. They are able to formulate extensions of the standard model. Furthermore, they know how to test these extensions in low energy experiments, at high energy colliders and in cosmology.

**Courses**  
(type, number of weekly contact hours, language — if other than German)  
V (3) + R (1)

Module taught in: German or English

**Method of assessment**  
(type, scope, language — if other than German, examination offered — if not every semester, information on whether module is creditable for bonus)  
written examination (approx. 90 to 120 minutes) or oral examination of one candidate each (approx. 30 minutes) or oral examination in groups (groups of 2, approx. 30 minutes per candidate) or project report (approx. 8 to 10 pages) or presentation/talk (approx. 30 minutes).

If a written examination was chosen as method of assessment, this may be changed and assessment may instead take the form of an oral examination of one candidate each or an oral examination in groups. If the method of assessment is changed, the lecturer must inform students about this by four weeks prior to the original examination date at the latest.

Assessment offered: In the semester in which the course is offered and in the subsequent semester

Language of assessment: German and/or English

**Allocation of places**
