|---|---|--------------------------------------|---|----------------------------------|---------------------|--|
| Current Topics in Nanostructure Technology  |   |                                      |   |                                  | 11-EXN7-Int-201-m01 |  |
| Module coordinator  |   |                                      |   | Module offered by                |                     |  |
| chairperson of examination committee  |   |                                      |   | Faculty of Physics and Astronomy |                     |  |
| ECTS Method of grading  |   | Only after succ. compl. of module(s) |   |                                  |                     |  |
| 7 numerical grade   |   |                                      |   |                                  |                     |  |
| Duration  |   | Module level                         | Other prerequisites                           |                                  |                     |  |
| 1 semester §  |   | graduate                             | Approval from examination committee required. |                                  |                     |  |
| Contents  |   |                                      |   |                                  |                     |  |
| Current topics in experimental or theoretical physics. Credited academic achievements, e.g. in case of change of university or study abroad.  |   |                                      |   |                                  |                     |  |
| Intended learning outcomes  |   |                                      |   |                                  |                     |  |
| The student posseses advanced knowledge meeting the requirements of a module in theoretical or experimental physics on Master's level in the study programme Nanostructure Technology. He/She commands knowledge in a current field in physics and insight into the measuring and calculating methods which are necessary to acquire this knowledge. He/She is able to classify and to link the learnt. He/She knows about fields of application.   |   |                                      |   |                                  |                     |  |
| Courses (type, number of weekly contact hours, language — if other than German)   |   |                                      |   |                                  |                     |  |
| V (3) + R (1)<br>Module taught in: English  |   |                                      |   |                                  |                     |  |
| <b>Method of assessment</b> (type, scope, language — if other than German, examination offered — if not every semester, information on whether module is creditable for bonus)  |   |                                      |   |                                  |                     |  |
| a) written examination (approx. 90 to 120 minutes) or b) oral examination of one candidate each (approx. 30 mi-<br>nutes) or c) oral examination in groups (groups of 2, approx. 30 minutes per candidate) or d) project report (ap-<br>prox. 8 to 10 pages) or e) presentation/talk (approx. 30 minutes).<br>If a written examination was chosen as method of assessment, this may be changed and assessment may in-<br>stead take the form of an oral examination of one candidate each or an oral examination in groups. If the method<br>of assessment is changed, the lecturer must inform students about this by four weeks prior to the original exami-<br>nation date at the latest.<br>Language of assessment: English |   |                                      |   |                                  |                     |  |
| Allocation of places  |   |                                      |   |                                  |                     |  |
