

Module description

		A 13 ME STATE OF	00 8/4/2/	_	
Module title				Abbreviation	
Current Topics in Quantum Technology 11-EXN8-212-mo1					
Module coordinator			Module offered by		
chairperson of examination committee			Faculty of Physics and Astronomy		
ECTS Method of grading		Only after succ. co	Only after succ. compl. of module(s)		
8 num	erical grade				
Duration	Module level	Other prerequisites	Other prerequisites		
1 semester graduate Approval from examination		nination committee r	tion committee required.		
Contents					
Current topics in experimental or theoretical physics. Credited academic achievements, e.g. in case of change of university or study abroad.					
Intended learning outcomes					
The student posseses advanced knowledge meeting the requirements of a module in theoretical or experimental physics on Master's level in the study programme Quantum Technology. He/She commands knowledge in a current field in physics and insight into the measuring and calculating methods which are necessary to acquire this knowledge. He/She is able to classify and to link the learnt. He/She knows about fields of application.					
Courses (type, number of weekly contact hours, language — if other than German)					
V (4) + R (2)					
Module taught in: German or English					
Method of assessment (type, scope, language — if other than German, examination offered — if not every semester, information on whether module is creditable for bonus)					
or oral exam pages) or pro If a written e stead take the of assessmenation date a	ination in groups (grou esentation/talk (appro xamination was chose ne form of an oral exam nt is changed, the lect	ps of 2, approx. 30 minutes). n as method of assessmalination of one candidaturer must inform studen	utes per candidate) on tent, this may be cha e each or an oral exa	Ididate each (approx. 30 minutes) or project report (approx. 8 to 10 anged and assessment may intended in groups. If the method weeks prior to the original exami-
