Specific and advanced knowledge of independent scientific work in a current research area, especially in the specialist field of Dirac fermions in mesoscopic systems, reproduction of knowledge, acquisition of social and methodological competencies.		
Intended learning outcomes		
The students have special and advanced knowledge of independent scientific work in a current research area, especially in the field of Dirac fermions in mesoscopic systems, and are able to reproduce the acquired knowledge, to apply the acquired methods and to summarise a sub-area of the current research area in an oral presentation.
