

Module title					Abbreviation
Crystal Growth, thin Layers and Lithography 11-KDS-152-mo1					
Module coordinator				Module offered by	
Managing Director of the Institute of Ap			pplied Physics Faculty of Physics and Astronomy		
ECTS	ECTS Method of grading		Only after succ. compl. of module(s)		
6	nume	rical grade			
Duration Module level		Module level	Other prerequisites		
1 semester		undergraduate			
Contents					
Crystal growth, thin films, lithography.					
Intended learning outcomes					
The students have knowledge of crystal growth and the techniques and methods to control crystal growth in the laboratory. They have methodological knowledge of the production and examination of thin layers and know techniques and applications of lithography.					
<b>Courses</b> (type, number of weekly contact hours, language — if other than German)					
V (3) + R (1) Module taught in: German or English					
<b>Method of assessment</b> (type, scope, language — if other than German, examination offered — if not every semester, information on whether module is creditable for bonus)					
or oral examination in groups (groups of 2, approx. 30 minutes per candidate) or project report (approx. 8 to 10 pages) or presentation/talk (approx. 30 minutes). If a written examination was chosen as method of assessment, this may be changed and assessment may in- stead take the form of an oral examination of one candidate each or an oral examination in groups. If the method of assessment is changed, the lecturer must inform students about this by four weeks prior to the original exami- nation date at the latest. Assessment offered: Once a year, winter semester Language of assessment: German and/or English					
Allocation of places					
Additional information					
Workload					
180 h					
Teaching cycle					
<b>Referred to in LPO I</b> (examination regulations for teaching-degree programmes)					
Module appears in
