### Contents

- Basics of ordinary and partial differential equations of physics.
  1. Ordinary differential equations;
     1.1. Solution methods
     1.2 Existence and uniqueness theorem
     1.3 Systems of differential equations
  2. Partial differential equations
     2.1 Non-linear partial differential equations of the 1st and 2nd order
     2.2 1D and 3D wave equation
     2.3 Helmholtz equation and potential theory
     2.4 Parabolic differential equations

### Intended learning outcomes

The students have basic mathematical knowledge of dynamic equations and solution methods for common and partial differential equations and have mastered the necessary calculation methods.

### Courses

V (4) + Ü (2)
Module taught in: Ü: German or English

### Method of assessment

written examination (approx. 120 minutes)
Language of assessment: German and/or English

### Allocation of places

--

### Additional information

--

### Referred to in LPO I

(examination regulations for teaching-degree programmes)

--

### Module appears in

Bachelor' degree (1 major) Physics (2015)
Bachelor' degree (1 major) Nanostructure Technology (2015)
Bachelor' degree (1 major) Functional Materials (2015)
