

Module title					Abbreviation
Advanced Magnetic Resonance Imaging					11-MRI-171-m01
Module coordinator				Module offered by	
Managing Director of the Institute of Applied Physics Faculty of Physics					nd Astronomy
ECTS Method of grading		Only after succ. compl. of module(s)			
6	nume	rical grade			
Duration		Module level	Other prerequisites		
1 semester		graduate			
Contents					
Nuclear magnetic resonance (NMR) is a quantum mechanical phenomenon that, through magnetic resonance imaging (MRI), has played a major role in the revolution of medical imaging over the last 30 years. Based on the fundamental principles of nuclear magnetic resonance (resonance principle, relaxation times, chemical shift) this course covers: 1) the NMR signal theory and signal evolution (Bloch equations), 2) the principles of spatial encoding, magnetic resonance imaging (MRI) and corresponding imaging sequences and measurement parameters, 3) the concept of k-space and Fourier imaging, and 4) the physical, methodological and technical possibilities and limits of MRI. As a last point, exemplary applicati- on fields of MRI of biomedical research, clinical imaging and non-destructive testing are introduced. Intended learning outcomes					
The students have advanced knowledge of the mathematical-theoretical and physical principles of modern ima- ging magnetic resonance, image generation and processing. They gain a broad overview of the field of modern MRI and its interdisciplinary contexts and applications.					
Courses (type, number of weekly contact hours, language — if other than German)					
V (3) + R (1) Module taught in: English					
Method of assessment (type, scope, language — if other than German, examination offered — if not every semester, information on whether module is creditable for bonus)					
a) written examination (approx. 90 to 120 minutes) or b) oral examination of one candidate each (approx. 30 mi- nutes) or c) oral examination in groups (groups of 2, approx. 30 minutes per candidate) or d) project report (ap- prox. 8 to 10 pages) or e) presentation/talk (approx. 30 minutes). If a written examination was chosen as method of assessment, this may be changed and assessment may in- stead take the form of an oral examination of one candidate each or an oral examination in groups. If the method of assessment is changed, the lecturer must inform students about this by four weeks prior to the original exami- nation date at the latest. Assessment offered: In the semester in which the course is offered and in the subsequent semester Language of assessment: German and/or English					
Allocation of places					
Additional information					
Workload					
180 h					
Teaching cycle					
Referred to in LPO I (examination regulations for teaching-degree programmes)
