**Module title** | **Abbreviation**
---|---
Advanced Laboratory Course Nanostructure Technology C | 11-P-NC-122-m01

**Module coordinator** | **Module offered by**
Managing Director of the Institute of Applied Physics | Faculty of Physics and Astronomy

**ECTS** | **Method of grading** | **Other prerequisites**
---|---|---
4 | (not) successfully completed | 11-P-PA and 11-P-NB

**Duration** | **Module level** |
---|---
1 semester | undergraduate |

**Contents**
Physical laws of wave optics, Molecular, Atomic and Nuclear Physics and modern measuring methods using special computerised devices with examples from optics and Solid-State Physics.

**Intended learning outcomes**
The students are able to build and almost independently operate advanced experimental setups. They are able to record measuring results in a structured manner, even in case of huge data traffic, and to analyse the results by using error propagation and statistics. They are able to evaluate results, to draw conclusions and to present and discuss them in a scientific paper and a presentation.

**Courses**
(no information on SWS (weekly contact hours) and course language available)

**Method of assessment**
Preparing, performing and evaluating (lab report) the experiments will be considered successfully completed if a Testat (exam) is passed. Experiments that were not successfully completed can be repeated once. Talk (with discussion; approx. 30 minutes) to test the candidate's understanding of the physics-related contents of the module component. Talks that were not successfully completed can be repeated once. Both components of the assessment have to be successfully completed.

**Allocation of places**
--

**Additional information**
