## Module description

Module title				Abbreviation	
Advanced Laboratory Course Quantum Technology C (Modern Physics, Compu- 11-P-NC-212-mo1					
ter Aided Experiments)					
Module coordinator			Module offered by		
Managing Director of the Institute of Ap		oplied Physics	hysics Faculty of Physics and Astronomy		
ECTS Method of grading		Only after succ. compl. of module(s)			
	successfully completed				
Duration Module level		Other prerequisites			
1 semester undergraduate		Students are highly recommended to complete module 11-P-NB prior to completing module 11-P-NC.			
Contents					
Physical laws of wave optics, Molecular, Atomic and Nuclear Physics and modern measuring methods using spe- cial computerised devices with examples from optics and Solid-State Physics.					
Intended learning outcomes					
The students are able to build and almost independently operate advanced experimental setups. They are ableto record measuring results in a structured manner, even in case of huge data traffic, and to analyse the resultsby using error propagation and statistics. They are able to evaluate results, to draw conclusions and to present and discuss them in a scientific paper and a presentation.					
Courses (type, number of weekly contact hours, language — if other than German)					
P (2)					
<b>Method of assessment</b> (type, scope, language — if other than German, examination offered — if not every semester, information on whether module is creditable for bonus)					
practical assignment with talk (approx. 30 minutes) Preparing, performing and evaluating (record of readings or lab report) the experiments will be considered suc- cessfully completed if a Testat (exam) is passed. Exactly one experiment that was not successfully completed can be repeated once. After completion of all experiments, talk (with discussion; approx. 30 minutes) to test the candidate's understanding of the physics-related contents of the module. Talks that were not successfully com- pleted can be repeated once. Both components of the assessment have to be successfully completed.					
Allocation of places					
Additional information					
Workload					
120 h					
Teaching cycle					
Referred to in LPO I (examination regulations for teaching-degree programmes)					
Module appears in					
Bachelor' degree (1 major) Quantum Technology (2021) exchange program Physics (2023)					
JMU Würzburg • generated 29.03.2024 • Module data record 130958
