Module title: Laboratory Course Physics B (Classical Physics, Electricity, Circuits)

Abbreviation: 11-P-PB-152-m01

Module coordinator: Managing Director of the Institute of Applied Physics
Module offered by: Faculty of Physics and Astronomy

ECTS: 8
Method of grading: Only after succ. compl. of module(s)

Duration: 2 semester
Module level: undergraduate
Other prerequisites: Students are highly recommended to complete modules 11-P-PA and 11-P-FR1 prior to completing module 11-P-PB.

Contents:
Physical laws of optics, vibrations and waves, science of electricity and circuits with electric components.

Intended learning outcomes:
The students know and have mastered physical measuring methods and experimenting techniques. They are able to independently plan and conduct experiments, to cooperate with others, and to document the results in a measuring protocol. They are able to evaluate the measuring results on the basis of error propagation and of the principles of statistics and to draw, present and discuss the conclusions.

Courses:
P (2) + P (2)

Method of assessment:
practical assignment with talk (approx. 30 minutes)
Preparing, performing and evaluating (record of readings or lab report) the experiments will be considered successfully completed if a Testat (exam) is passed. Exactly one experiment that was not successfully completed can be repeated once. After completion of all experiments, talk (with discussion; approx. 30 minutes) to test the candidate's understanding of the physics-related contents of the module. Talks that were not successfully completed can be repeated once. Both components of the assessment have to be successfully completed.

Allocation of places:

Additional information:

Referred to in LPO I (examination regulations for teaching-degree programmes):

Module appears in:
Bachelor' degree (1 major) Physics (2015)
