Only after succ. compl. of module(s)

### (not) successfully completed

11-P-PA

### Duration

1 semester

### Module level

undergraduate

### Other prerequisites

--

### Contents

Physical laws of optics, vibrations and waves or science of electricity and circuits with electric components.

### Intended learning outcomes

The students have knowledge and skills of physical measuring instruments and experimental techniques. They are able to independently plan and conduct experiments in cooperation with others, and to document the results in a measurement protocol.

### Courses

**Klassische Physik (Classical Physics, KLP):** P (2 weekly contact hours)

**Elektrizitätslehre und Schaltungen (Electricity and Circuits, ELS):** P (2 weekly contact hours)

### Method of assessment

This module has the following assessment components

- a) Preparing, performing and evaluating the experiments will be considered successfully completed if a Testat (exam) is passed. b) Talk (with discussion) to test the students' understanding of the physics-related contents of the course (approx. 30 minutes).

Students must register for assessment online (registration deadline to be announced).

Students will be offered one opportunity to retake element a) and/or element b). To pass an assessment component, students must pass both elements a) and b).

To pass this module, students must successfully complete one out of the two courses.

To pass this module, students must pass the assessment components.
