Advanced Laboratory Course Physics C  
11-P-PC-122-m01

Module coordinator  
Managing Director of the Institute of Applied Physics

Module offered by  
Faculty of Physics and Astronomy

ECTS 8

Method of grading (not) successfully completed 11-P-PA and 11-P-PB

Duration 1 semester

Module level undergraduate

Other prerequisites --

Contents

Physical laws of wave optics, Molecular, Atomic and Nuclear Physics and modern measuring methods using special computerised devices with examples from optics and Solid-State Physics.

Intended learning outcomes

The students are able to build and almost independently operate advanced experimental setups. They are able to record measuring results in a structured manner, even in case of huge data traffic, and to analyse the results by using error propagation and statistics. They are able to evaluate results, to draw conclusions and to present and discuss them in a scientific paper and a presentation.

Courses

Physikalisches Praktikum (Physics Practical Course) Part C-1: P (2 weekly contact hours)
Physikalisches Praktikum (Physics Practical Course) Part C-2: P (2 weekly contact hours)

Method of assessment

This module has the following assessment components

1. Lab course in part 1: a) Preparing, performing and evaluating the experiments will be considered successfully completed if a Testat (exam) is passed. b) Talk (with discussion) to test the students' understanding of the physics-related contents of the course (approx. 30 minutes).

2. Lab course in part 2: a) Preparing, performing and evaluating the experiments will be considered successfully completed if a Testat (exam) is passed. b) Talk (with discussion) to test the students' understanding of the physics-related contents of the course (approx. 30 minutes).

Students must register for assessment components 1 and 2 online (registration deadline to be announced). Students will be offered one opportunity to retake element a) and/or element b). To pass an assessment component, they must pass both elements a) and b).

To pass this module, students must pass both assessment component 1 and assessment component 2.

Allocation of places
