| 1 semester graduate   |   | Certain prerequisites must be met to qualify for admission to as-<br>sessment. The lecturer will inform students about the respective details<br>at the beginning of the course. Registration for the course will be con-<br>sidered a declaration of will to seek admission to assessment. If stu-<br>dents have obtained the qualification for admission to assessment over<br>the course of the semester, the lecturer will put their registration for as-<br>sessment into effect. Students who meet all prerequisites will be admit-<br>ted to assessment in the current or in the subsequent semester. For as-<br>sessment at a later date, students will have to obtain the qualification for<br>admission to assessment anew. |   |  |

Theory of neural networks</li> </ul> Intended learning outcomes The students have specific and advanced knowledge in the field of physics of complex systems. They know the methods of Statistical Physics, Computational Physics and non-linear dynamics, which are used to describe |   |   |   |  |
| such systems. They are able to work on current research problems in this area. Courses (type, number of weekly contact hours, language — if other than German)  |   |   |   |  |
