

Module title		Abbreviation
Quantum Information and Quantum Computing		11-QIC-161-mo1
Module coordinator		Module offered by
Managing Director of the Institute of Theoretical Physics and Astrophysics		Faculty of Physics and Astronomy
ECTS	Method of grading	Only after succ. compl. of module(s)
6	numerical grade	11-QM2 or 11-TFK
Duration	Module level	Other prerequisites
1 semester	graduate	--
Contents		
1. Brief summary of classical information theory 2. Quantum theory seen from the perspective of information theory 3. Composite systems and the Schmidt decomposition 4. Entanglement measures 5. Quantum operations, POVMs, and the theorems of Kraus and Stinespring 6. Quantum gates and quantum computers 7. Elements of the theory of decoherence		
Intended learning outcomes		
The students acquire a comprehensive understanding of quantum states and density matrices beyond the usual textbook interpretation. They learn how to safely handle tensor products and multipartite quantum systems. The main topics of the lecture include basic mathematical concepts of quantum information theory and the limits of quantum computing arising from decoherence.		
Courses (type, number of weekly contact hours, language — if other than German)		
V (3) + R (1) Module taught in: German or English		
Method of assessment (type, scope, language — if other than German, examination offered — if not every semester, information on whether module is creditable for bonus)		
written examination (approx. 90 to 120 minutes) or oral examination of one candidate each (approx. 30 minutes) or oral examination in groups (groups of 2, approx. 30 minutes per candidate) or project report (approx. 8 to 10 pages) or presentation/talk (approx. 30 minutes). If a written examination was chosen as method of assessment, this may be changed and assessment may instead take the form of an oral examination of one candidate each or an oral examination in groups. If the method of assessment is changed, the lecturer must inform students about this by four weeks prior to the original examination date at the latest. Assessment offered: In the semester in which the course is offered and in the subsequent semester Language of assessment: German and/or English		
Allocation of places
