

# Module description

| Module title  |      |               |                                      |                                  | Abbreviation   |
|---|------|---------------|--------------------------------------|----------------------------------|----------------|
| Quantum Information Technology                        |      |               |                                      |                                  | 11-QUI-132-m01 |
| Module coordinator                                    |      |               |                                      | Module offered by                |                |
| Managing Director of the Institute of Applied Physics |      |               |                                      | Faculty of Physics and Astronomy |                |
| ECTS  | Meth | od of grading | Only after succ. compl. of module(s) |                                  |                |
| 6   | nume | rical grade   |                                      |                                  |                |
| Duration  |      | Module level  | Other prerequisites                  |                                  |                |
| 1 semester  |      | graduate      |                                      |                                  |                |
| Contents  |      |               |                                      |                                  |                |

#### Contents

Basic concepts of quantum mechanics, quantum bits and algorithms, quantal measurements, experimental approaches towards quantum computing (on the basis of photons, ions and nuclear spins), quantum operations and quantum noise, quantum information and communication.

#### Intended learning outcomes

The students are familiar with the basic quantum mechanical terms of quantum information technology. They know experimental approaches for the realisation of quantum computers and for the transfer of quantum information.

 $\textbf{Courses} \ (\textbf{type}, \, \textbf{number of weekly contact hours, language} - \textbf{if other than German})$ 

V + R (no information on SWS (weekly contact hours) and course language available)

**Method of assessment** (type, scope, language — if other than German, examination offered — if not every semester, information on whether module is creditable for bonus)

a) written examination (approx. 90 minutes) or b) oral examination of one candidate each or oral examination in groups (approx. 30 minutes per candidate) or c) project report (approx. 8 to 10 pages, time to complete: 1 to 4 weeks) or d) presentation/seminar presentation (approx. 30 minutes)

Assessment offered: When and how often assessment will be offered depends on the method of assessment and will be announced in due form under observance of Section 32 Subsection 3 ASPO (general academic and examination regulations) 2009.

Language of assessment: German, English

### Allocation of places

--

#### **Additional information**
