## Module description

Module title					Abbreviation
Theoretical Mechanics					11-T-MV-162-m01
Module coordinator				Module offered by	
Managing Director of the Institute of Theoretical Physics Faculty of Physics and Astronomy and Astrophysics					
ECTS Method of grading		Only after succ. compl. of module(s)			
5 numerical grade					
Duration		Module level	Other prerequisites		
1 semester		undergraduate			
Contents					
<ol> <li>Newton's formulation: Inertial systems, Newton's laws of motion, equations of motion; one-dimensional motion, energy conservation; Harmonic oscillator; Movement in space of intuition, conservative forces;</li> <li>Lagrangian formulation: Variational principles, Euler-Lagrange equation; constraints; coordinate transformations, mechanical gauge transformation; symmetries, Noether theorem, cyclic coordinates; accelerated reference systems and apparent forces;</li> <li>Hamiltonian formulation: Legendre transformation, phase space; Hamilton function, canonical equations; Poisson brackets, canonical transformations; generator of symmetries, conservation laws; minimal coupling; Liouville theorem; Hamilton-Jacobi formulation [optional];</li> <li>Applications: Central-force problems; mechanical similarity, Virial theorem; minor vibrations; particles in an electromagnetic field; rigid bodies, torque and inertia tensor, centrifugal and Euler equations [optional]; scattering, cross section [optional];</li> <li>Relativistic dynamics: Lorentz Transformation; Minkowski space; equations of motion;</li> <li>Non-linear dynamics: Stability theory; KAM theory [optional]; deterministic chaos [optional]</li> <li>Intended learning outcomes</li> <li>The students have gained first experiences concerning the working methods of Theoretical Physics. They are familiar with the principles of theoretical methods and techniques to simple problems of Theoretical Physics and to interpret the results. They have especially acquired knowledge of basic mathematical concepts.</li> </ol>					
<b>Courses</b> (type, number of weekly contact hours, language — if other than German)					
V (4)					
<b>Method of assessment</b> (type, scope, language — if other than German, examination offered — if not every semester, information on whether module is creditable for bonus)					
written examination (approx. 120 minutes) Language of assessment: German and/or English					
Allocation of places					
Additional information					
Workload					
150 h					
Teaching cycle					
Referred to in LPO I (examination regulations for teaching-degree programmes)					
Module					
Bachelor' degree (1 major) Mathematical Physics (2016)					

8 83
